PLEASE READ FIRST

**QUICK SET UP GUIDE 2055A**

1. Remove all cardboard pieces from the disc pack.
2. Finding the ideal location for your unit: Do not place the humidifier directly next to a heating or air vent.
3. The unit should be placed on a dry, level surface. Keep it away from walls, doors or windows.
4. The unit should not be placed too close to plants or other objects. Keep a distance of at least 20 inches (50cm).

**WATER QUALITY MAINTENANCE WITH HYDRO CELL**

- Water Quality Maintenance
  The Hydro Cell keeps humidifiers operating at their highest level between recommended cleanings*. Good for approximately one to two months, depending on the water quality, the Hydro Cell ensures the humidifier’s functionality while providing fresh humidification performance.
  
  * Refer to the user manual for proper cleaning instructions.

**QUICK OPERATION DESCRIPTION 2055A**

- **A** Rotary dial On/Off
- **B** Position Off
- **C** Normal mode
- **D** Night mode
- **E** Operating light and Automatic Shut-Off «Tank empty» Indicator

**FILL THE TANK WITH FRESH COLD WATER**

- Take off the water tank cap to fill the tank with water.
- Fill the tank with clean, cold water from the tap.
- Do not pour water directly into the appliance. Use the water tank only.
- Close the cap of the water tank securely, place the water tank onto the base. The water is now running from the tank into the base. The red empty indicator light may stay illuminated for some seconds until the base is filled with water.

**QUICK SET UP GUIDE 2055A**

- Insert the plug into the socket and switch on the appliance using the On/Off dial. The green light comes on.

RECOMMENDED TO CLEAN WITH EZCal AND EZCal PRO

What is EZCal and EZCal Pro?
EZCal and EZCal Pro are cleaning and descaling agents recommended for all humidifiers. The decalcification ingredients clean the mineral buildup in the humidifier base.

TROUBLESHOOTING
